## SINGLE MODULE ARC FAULT DETECTION DEVICES WITH INTEGRAL RCBO

Three products in one MCB sized footprint

It does the job of an AFDD, an MCB and an RCD

With integral Type A 30mA RCBO

Provides overload protection, short circuit protection, shock protection & arc fault protection

Ring circuit compatible, works on spurs, radials & leads too

Two pole switching device for total isolation of faulty circuits and equipment

No need for bigger consumer units

Fully complies with the requirements & recommendations of the 18th Edition

Detects arc faults that would otherwise go undetected

Prevents electrical fires from arc faults in final circuits

Good reasons to choose Wylex, there's lots of them
